Elias Paul

eliaspaul.k2004@gmail.com | +971568105920 | Dubai, UAE | Portfolio | LinkedIn | GitHub

Summary

Recent BSc Information Technology graduate with First Class Honours and a 4.0 GPA, with hands-on experience in data analytics, business intelligence, machine learning, and software development. Experienced in Python, Excel, Power BI, and data analysis, with additional experience in requirements gathering, workflow documentation, process improvement, and cross-functional collaboration.

Education

Middlesex University
BSc (Hons) Information Technology

First Class Honours | GPA: 4.0 | September 2022 – June 2025

Experience

FINESSE FZ LLC Dubai UAE
Trainee-BI Analytics September 2023 – Present

Sales Forecasting: Compared Naive, Holt-Winters and SARIMA with rolling backtesting; best model (multiplicative Holt-Winters) reached 12.98% MAPE, with a six-month forecast and 95% prediction intervals.

Telco Customer Churn: Built four ML models with SHAP; threshold tuning raised recall from 60.1% to 82.9%, cutting missed churners from 105 to 45.

Gym Churn Early-Warning Tool: Predicts member churn from first two weeks of activity with SHAP explanations; 0.788 AUC, early attendance the top driver.

KFC YUM! Brands Dubai UAE
Operations Intern September 2025 – January 2026

- Validated sales and transaction data in Excel using XLOOKUP and integrity checks to ensure accurate operational reporting.
- Analyzed multidimensional business data with Excel Pivot Tables and OLAP cubes to support reporting and insights.
- Analyzed customer and employee survey data in Qualtrics, using correlation analysis and validation to identify trends.
- Maintained and tested Power BI dashboards and Control Tower training data to ensure reliable reporting.

Shunya Ekai Technologies - Client: Medhub Global Dubai UAE
Computer Science Intern June 2025 – August 2025

- Developed an EV route-mapping system using React, JavaScript, and Google Maps API, integrating charging-station availability and location-based services for dynamic route planning.
- Developed and refined a logistics machine-learning model to classify medical products across allowable air, sea, and road transport modes based on product characteristics and transportation requirements.
- Implemented model logic to identify exclusion criteria and predict port-to-port transit times and freight-cost ranges for data-driven shipment planning.

Projects

PetPulse | Machine Learning & Full-Stack Application

- Developed a **Flask-based ML web application using Random Forest** to predict pet diseases from symptoms, integrating MongoDB for user authentication and prediction history tracking.

Vehicle Sales Analysis & Prediction | Data Analytics & Machine Learning

- Analyzed US used-vehicle sales data, developed interactive dashboards, and built a **J48 classification model achieving 94.65% accuracy** in predicting vehicle age categories.

ACHIEVEMENTS

UAE Golden Visa
Awarded a UAE Golden Visa as an outstanding student.

Skills

Data & Analytics	Machine Learning	Programming	Databases & Tools	Business & Process
Python, SQL, Excel, PowerBI, Tableau, Data Analysis, Data Visualization, Data Validation, OLAP	scikit-learn, Random Forest, pandas, Classification, Predictive Modeling, Hyperparameter, Threshold Tuning	JavaScript, React.js, Vue.js, Node.js, Flask, Express.js, REST APIs	MongoDB, Postman, UiPath, Qualtrics	BPMN, Requirements Gathering, Process Analysis, Agile/Scrum
